

System 50 Flex - Aluminium (Flex AL)

All components RoHS-compatible

Design:

- Extraction arm for mounting on table
- Working range 600 mm
- Recommended airflow 45 to 85 m³/h
- Diameter of tube: Ø50 mm
- Tubes and extractor tube made of anodized Aluminium - surface 10 µ - in combination with a flexible hose
- Increased options of positioning due to the flexible hose
- With funnel of the extractor tube in order to increase the capture efficiency
- Acid-proof POP[®] rivets
- Colour of rings/flange: white (-5), red (-4) or black (-050)
