

## System 75 - Chemical resistant (PP)

- Metal hood recommended for light dust, fumes, gases and over open vessels
- Diameter of hood:  $\varnothing 200$  mm
- Hood made of polyester powder-coated aluminium
- Connection tube and flange made of chemical resistant polypropylene (PP)
- Colour of flange and hood: white (-5) or red (-4)

## Capture efficiency

The relatively low efficiency indicates, that the illustrated position is not optimal for this hood. For system 100 other measurements have been made for a similar round hood - see article no. [1-10024](#).
